Aim

To provide the required knowledge and skills for pharmacists who are starting out in critical care.

Learning Outcomes:

At the end of this masterclass, participants will be able to:

- Identify the causes of shock and the balance between perfusion and pressure
- Describe the basics of fluid balance and fluid choice in critical care
- Describe the advanced practitioner framework and explain its relevance to their role
- Inform choices on critical care specific drugs; keeping the patient calm, connected to the ventilator and free from pain
- Provide an overview on the use of haemofiltration in critical care
- Describe pharmaceutical aspects of the management of sepsis
- Identify important aspects in pharmaceutical screening of critically ill patients
